

Hello,

This letter is to express my interest in your posting for the position of Intern. I'm a computer science and engineering graduate with an advanced post-graduate diploma in banking & information technology and 2 years of professional hands-on experience in databases and application support and development. Currently, I am pursuing a Master of Engineering in software engineering from A. James Clark School of Engineering, University of Maryland. And, along with my master's I am working as a Graduate Teaching Assistant for Data Analytics and Object-Oriented Programming to undergraduate courses. I believe with my graduate education, professional experience, and spirit I'm quite able to do this job efficiently.

I enjoy being challenged and engaging with projects that require me to work outside my comfort and knowledge set. During my job, I have been the best employee consecutively for 2 years being the best communicator between the development team and the client. I am a self-starter and motivated team player with the ability to accomplish tasks independently.

Your listed requirements closely match my background and skills. A few I would like to highlight that would enable me to contribute to your bottom line are:

- Highly skilled in handling CRUD operations.
- Thorough understanding of managing software projects.
- Knowledge of backend/front-end development best practices.
- Hands-on software/application troubleshooting experience.
- Proven track record for proper documentation of future maintenance and upgrades.
- Ability to work with cross-functional teams and take full ownership of assigned tasks.
- Strong organizational and interpersonal skills.
- Ability to meet deadlines.

I've attached a copy of my resume that details my projects and experience in software support and development. I can be reached anytime via my cell phone, +1(202) 330-1580 or via email at write2rishika.saini@gmail.com

Thank you for your time and consideration. I look forward to hearing from you and share more information about me whenever required.

Sincerely,

Rishika Saini
